

REMARKS

The specification has been amended to clarify the electroluminescent material. The term "organic" was included originally in claim 19 of the parent application serial no. 09/352,198, which was incorporated by reference in the subject application. Claims 18, 31 and 32 have been amended and new claims 33-46 have been added. Examination on the merits is requested.

Respectfully submitted,

Eric J. Robinson

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE SPECIFICATION

Please amend the specification as follows:

Page 16, Paragraph 6, continuing on Page 17

The present invention can be also carried out when an active matrix type electrooptical device such as a liquid crystal display or an organic EL (electroluminescence) display device is fabricated.

Page 18, Paragraph 1

Moreover, although the description has been made of the liquid crystal display device as an example, the present invention can also be applied to an organic EL (electroluminescence) display device or an EC (electrochromic) display device as long as the device is an active matrix type display device.

IN THE CLAIMS

18. (Amended) A method of manufacturing a semiconductor device according to any one of claims 1-12, wherein said semiconductor device is at least one selected from the group consisting of a personal computer, a video camera, a mobile computer, a player using a recording medium, a goggle-type display, a digital camera, and a projector.

31. (Amended) A method of manufacturing a semiconductor device according to claim 19, wherein said semiconductor device is at least one selected from the group consisting of a personal computer, a video camera, a mobile computer, a player using a recording medium, a goggle-type display, a digital camera, and a projector.

32. (Amended) A method of manufacturing a semiconductor device according to claim 20, wherein said semiconductor device is at least one selected from the group consisting of a personal computer, a video camera, a mobile computer, a player using a recording medium, a goggle-type display, a digital camera, and a projector.
